Art Unit: 1743

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-36, drawn to method and instrument for determining ozone or nitrogen oxides in air having an equilibrium altering means, classified in class 436, subclass 118.
 - II. Claims 37-41, drawn to a sensor apparatus having means to shield the sensor from direct contact with the air and means to cause air to move through the shield, classified in class 422, subclass 98.
 - III. Claims 42-43, drawn to a sensor apparatus having means to regulate the sensor temperature and calculate the air flow over the sensor, classified in class 422, subclass 98.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation in that each has the sensor and one additional component that performs a different function in combination with the sensor. In Group I the equilibrium altering means changes the concentration of one or more species in the air, in Group II the shield means prevents the sensor from direct contact with the air and in Group III the temperature regulating means and air flow calculating means function to control the sensor temperature.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group is not required for Group, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. A telephone call was made to John A. Fortkort on March 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made

Art Unit: 1743

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arlen Soderquist whose telephone number is (703) 308-3989. The examiner's schedule is variable between the hours of about 5:30 AM to about 5:00 PM on Monday through Thursday and alternate Fridays.

For communication by fax to the organization where this application or proceeding is assigned, (703) 305-7719 may be used for official, unofficial or draft papers. When using this number a call to alert the examiner would be appreciated. Numbers for faxing official papers are 703-872-9310 (before finals), 703-872-9311 (after-final), 703-305-7718, 703-305-5408 and 703-305-5433. The above fax numbers will generally allow the papers to be forwarded to the examiner in a timely manner.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
